

Bio-Oregon Quick Product Guide

Strategy	Feed Size (mm)	Mash	#0	#1	#2	1.2	1.5	2.0	2.5	3.0	4.0
	Fish Size (#Fish/Lb)**	> 3000	3000 - 570	570 - 300	300 - 150	150 - 90	90 - 60	60 - 25	25 - 11	11 - 6	6 - 1
	Fish Size (grams)**	< 0.15	0.15 - 0.8	0.8 - 1.5	1.5 - 3.0	3.0 - 5.0	5.0 - 8.0	8.0 - 18	18 - 40	40 - 75	75 - 400

<p>Premium BioVita Starter BioVita Fry</p> <p>For hatcheries looking to feed a premium all fishmeal and fish oil diet (recommended for Chinooks).</p>
<p>Replacement BioClark's Starter* BioClark's Fry*</p> <p>Recommended for facilities looking for a diet which offers dependable performance with the advantage of improved price and raw material sustainability.</p>
<p>Performance BioVita Starter BioClark's Starter* Bio-Olympic Fry*</p> <p>Recommended for outstanding growth rates and shortened production time.</p>
<p>Transfer BioVita Starter BioClark's Starter* BioTransfer*</p> <p>For improved survival during transfer to saltwater. BioTransfer contains betaine, sea salt, beta-glucans and extra vitamins which all help fish adapt to their new osmotic conditions.</p>
<p>Soft semi-moist BioVita Starter BioClark's Starter* BioDiet Grower*</p> <p>BioDiet Grower is a highly stable semi-moist soft pellet which does not require refrigerated shipping or storage. Palatability is enhanced by the softer pellet texture and the inclusion of high quality fishmeal, fish oil and concentrated natural flavors. For detailed BioDiet Grower feeding guidelines please contact your local Bio-Oregon representative.</p>
<p>Low phosphorus BioVita Starter BioClark's Starter* BioDry1000 LP*</p> <p>BioDry1000 LP is an extruded, low-pollution feed formulated to reduce dietary phosphorus content to less than one percent. It can also reduce the discharge of phosphorus from fish hatcheries and help improve water quality. For detailed BioDry 1000LP feeding guidelines please contact your local Bio-Oregon representative.</p>
<p>Trout BioVita Starter BioClark's Starter* BioTrout*</p> <p>BioTrout is a high energy steelhead and trout feed. It contains an enhanced vitamin pack (in sizes 1.5 - 4.0mm). For detailed BioTrout feeding guidelines please contact your local Bio-Oregon representative.</p>

* Replacement technology supports reductions in the fishmeal and fish oil content of our products by partial substitution with alternative proteins and a blend of alternative oils resulting in improved price and raw material sustainability.

** As feeding strategies vary greatly between species, sites and hatchery personnel, it is recommended that you use a strategy based on your own experience which will best meet your program goals. The above chart is based on literature reviews and interviews with experienced fish culturists, and are provided as a guide only. Bio-Oregon makes no guarantees related to these guidelines. Our staff is available for consultation regarding site specific guidelines.
